BBA

Biomembranes

Vol. 1110, 1992

Cumulative Contents

Regular Papers

Kinetics of transport systems dependent on periplasmic binding proteins
R.M. Krupka (Canada) 1

Testing models for transport systems dependent on periplasmic binding proteins
R.M. Krupka (Canada) 11

Determination of rate constants for nucleotide dissociation from Na,K-ATPase
M. Esmann (Denmark) 20

Effects of poly(L-lysine) on the structural and thermotropic properties of dipalmitoylphosphatidylglycerol bilayers
H. Takahashi, S. Matuoka, S. Kato, K. Ohki and I. Hatta (Japan) 29

Monensin intercalation in liposomes: effect on cytotoxicities of ricin, *Pseudomonas* exotoxin A and diphtheria toxin in CHO cells
S. Madan and P.C. Ghosh (India) 37

Lipid mixing is mediated by the hydrophobic surfactant protein SP-B but not by SP-C
M.A. Oosterlaken-Dijksterhuis, M. Van Eijk, L.M.G. Van Golde and H.P. Haagsman (Netherlands) 45

Nucleoside transport-deficient mutants of PK-15 pig kidney cell line
J.M. Aran and P.G.W. Plagemann (USA) 51

Regulation of phosphate transport by second messengers in capillaries of the blood-brain barrier
L. Dallaire, S. Giroux and R. Béliveau (Canada) 59

Enrichment of saturated fatty acid containing phospholipids in sheep brain serotonin receptor preparations: use of microwave irradiation for rapid transesterification of phospholipids
P. Banerjee, G. Dawson and A. Dasgupta (USA) 65

Inhibition of anion transport in the human red blood cell membrane with *para*- and *meta*-methoxyphenylglyoxal
E. Betakis, G. Fritzsch and L. Zaki (Germany) 75

Heterogeneity of pig kidney Na,K-ATPase as indicated by ADP- and ouabain-binding stoichiometry
J. Jensen (Denmark) 81

Liposome shrinkage and swelling under osmotic-diffusional stress: evaluation of kinetic parameters from spectrophotometric measurements
P. Ghosh and U.N. Singh (India) 88

Kinetics of melittin induced pore formation in the membrane of lipid vesicles
G. Schwarz, R.-t. Zong and T. Popescu (Switzerland) 97

Phloretin *keto-enol* tautomerism and inhibition of glucose transport in human erythrocytes (including effects of phloretin on anion transport)
G.F. Fuhrmann, S. Dernedde and G. Frenking (Germany) 105

Reaction mechanism and asymmetric orientation of the reconstituted chloroplast phosphate translocator
U.-I. Flügge (Germany) 112

Rapid Reports

Hexose-specific inhibition in vitro of human red cell Ca^{2+}-ATPase activity
M.R. Deziel, R.S. Safeer, S.D. Blas, F.B. Davis and P.J. Davis (USA) 119

H^+/glycyl-glycine cotransport in eel intestinal brush-border membrane vesicles: studies with the pH-sensitive dye Acridine orange
T. Verri, M. Maffia and C. Storelli (Italy) 123

Regular Papers

Dual specificity of sterol-mediated glycoalkaloid induced membrane disruption
E.A.J. Keukens, T. De Vrije, C.H.J.P. Fabrie, R.A. Demel, W.M.F. Jongen and B. De Kruijff (Netherlands) 127

Separation and inhibitor specificity of a second unidirectional efflux route for methotrexate in L1210 cells
G.B. Henderson (USA) 137

In archaebacteria, there is a doxorubicin efflux pump similar to mammalian P-glycoprotein
S. Miyauchi, M. Komatsubara and N. Kamo (Japan) 144

continued

Labelling of liposomes with intercalating perylene fluorescent dyes
H. Schott, D. Von Cunow and H. Langhals (Germany) 151

Dextran sulfate inhibits fusion of influenza virus and cells expressing influenza hemagglutinin with red blood cells
M. Krumbiegel, D.S. Dimitrov, A. Puri and R. Blumenthal (USA) 158

Characterization of the TRH-induced activation of Na^+/H^+-exchange in pituitary GH_4C_1 cells
K. Törnquist (Finland) 165

Archaebacterial lipid models: highly salt-tolerant membranes from 1,2-diphytanylglycero-3-phosphocholine
K. Yamauchi, K. Doi, M. Kinoshita, F. Kii and H. Fukuda (Japan) 171

Interaction of sulfhydryl reagents with A-type channels of *Lymnaea* neurons
S.I. Alekseev (Russia) 178

Asymmetric fusion between synthetic di-n-dodecylphosphate vesicles and virus membranes
T.A.A. Fonteijn, J.B.F.N. Engberts, S. Nir and D. Hoekstra (Netherlands, Israel) 185

Nuclear magnetic relaxation dispersion and ^{31}P-NMR studies of the effect of covalent modification of membrane surfaces with poly(ethylene glycol)
C. Tilcock, Q.F. Ahkong, S.H. Koenig, R.D. Brown III, G. Kabalka and D. Fisher (Canada, USA, UK) 193

Activation of the $Na^+/K^+/Cl^-$ cotransport system by reorganization of the actin filaments in Ehrlich ascites tumor cells
F. Jessen and E.K. Hoffmann (Denmark) 199

The fusion of artificial lipid membranes induced by the synthetic arenavirus 'fusion peptide'
S.E. Glushakova, V.G. Omelyanenko, I.S. Lukashevitch, A.A. Bogdanov, Jr., A.B. Moshnikova, A.T. Kozytch and V.P. Torchilin (Belarus, Russia) 202

Polarity of transport of 2-deoxy-D-glucose and D-glucose by cultured renal epithelia (LLC-PK_1)
J.H. Miller, J.M. Mullin, E. McAvoy and A. Kleinzeller (USA) 209

Formation of non-bilayer structures induced by M13 coat protein depends on the conformation of the protein
J.C. Sanders, T.W. Poile, C.J.A.M. Wolfs and M.A. Hemminga (Netherlands) 218

Alcohols dehydrate lipid membranes: an infrared study on hydrogen bonding
J.-S. Chiou, P.R. Krishna, H. Kamaya and I. Ueda (USA) 225

Rapid Reports

Inhibitors of the plasma membrane redox system of *Zea mays* L. roots. The vitamin K antagonists dicumarol and warfarin
O. Döring, S. Lüthje and M. Böttger (Germany) 235

Osmotic swelling and membrane conductances in A6 cells
M. Granitzer, P. Bakos, W. Nagel and J. Crabbé (Belgium) 239

Cumulative Contents, Vol. 1110 243

Author Index 245
